CCA competition on the SUDOKU.

Sudoku is a logic based number placement puzzle. The objective is to fill a  $9 \times 9$  grid so that each column, each row, and each of the nine  $3 \times 3$  boxes (also called blocks or regions) contains the digits from 1 to 9, only one time each. Sudoku makes us think – and think critically, and it can also help improve your concentration. Sudoku is a game that requires careful thought. You have to think about where you are going to be placing the numbers and if they are going to interfere with the numbers in other boxes and lines.

The students of Grades 1 to 10 had actively participated and enjoyed this competition. Sudoku puzzles are an excellent tool for building students' critical thinking skills. It also builds confidence in their abilities to complete challenging tasks, which can carry over into many aspects of classroom performance. The CCA activity helps the children learn about thought process and used to problem solving in day to day life situations .

## THE INTERNATIONAL VOLUNTEER DAY - GRADE V- 5<sup>TH</sup> DECEMBER 2022

(5 December), more commonly referred to as **International Volunteer Day (IVD)**, is an international observance mandated by the UN General Assembly in 1985. It offers an opportunity for volunteer-involving organizations and individual volunteers to promote volunteerism, encourage governments to support volunteer efforts, and recognize volunteer contributions to the achievement of the Sustainable Development Goals (SDGs) at local, national, and international levels.

International Volunteer Day is celebrated by many non-governmental organizations, civil society, and the private sector, among others. It is also marked and supported by the United Nations Volunteers (UNV) programme.

UNV coordinates a campaign to promote IVD every year, building on the impact volunteers have in communities, nationally, and globally for peace and development.

In 2018 the focus of IVD is not only to celebrate volunteerism in all its facets but also to highlight the role that volunteers play in building resilient communities. It is worth noting that current estimates equate the global volunteer workforce to 109 million full-time workers. 30 percent of volunteering takes place formally through organizations, associations, and groups; and 70 percent occurs through informal engagement between individuals. Overall, 60% of the informal volunteers are women.

For IVD 2021 celebrations, UNV worked with UN agencies, partners, Member States, and governments across the world to recognise and support the spirit of volunteerism to create a more inclusive and sustainable future for all - people and planet. Therefore, the campaign message - "Volunteer now for our common future." Students of Great V presented a special assembly and explained that International volunteer day (IVD) 2022 celebrates the theme of solidarity through volunteering. This campaign highlights the power of our collective humanity to drive positive change through volunteerism.

# WORLD ANTI-CORRUPTION DAY DAY: 9<sup>TH</sup> DECEMBER 2022 - GRADES XI AND XII

Corruption is a complex social, political and economic phenomenon that effect all countries. Corruption undermined democratic institution, slows economic development and contributes to governmental instability. Corruption attacks the foundation of democratic institution by distorting electoral process, perverting the rule of law and creating bureaucratic quagmires whose only reason for existing is the soliciting of bribes. Economic development is Shunted because foreign direct investment is discouraged and small businesses within the country of ten find it impossible to overcome the "start up costs" required because of corruption.

The Special Assembly was started by Abhinaya, followed with pledge by Ritika, thought for the day by Mehak, new word by Srikantha, significance of the day by Surya and news headlines by Srija.
